About:

Currently attending full-stack web development bootcamp at UC Berkeley- estimated completion time September 2020.

Technical skills:

- Browser based : HTML/CSS, Javascript/jQuery, Responsive designs
- Server side: Node.js
- API interaction: API, JSON, AJAX

Projects:

hangryFixed
Utilizing Javascript/jQuery, APIs, Bulma and other third party libraries, I built and designed an application that provided users a randomly generated restaurant based on their inputs.

Weather Dashboard

Using the openweather API, I built a robust search query that allowed users to search for the current and 5 day forecast of their chosen cities.

Random Password Generator

Using javascript, I built a robust backend process that will generate a random string of 8 to 128 indices of numbers, letters, and special characters that users can copy and use to strengthen their passwords.

Experience:

Assistant Manager, Blossom Salon and Spa, San Mateo CA 2014-March 2020

- Check-ins/outs clients and handle all payment transactions.
- Serve as a resource to provide recommendations for all hair services and products the salon offers.
- Resolve client complaints/issues with clients and provide prompt and accurate relay to management for major client complaints/issues.
- Schedule appointments via phone, email and our online request system.
- Opening/Closing the salon, which includes cash counting and register balance.
- Count inventory and upkeep of lounge areas.

Dental Assistant, Song Oral Surgery, San Francisco CA 2018-2019

- Assists surgeons by passing instruments, aspirating intra-oral fluids, mixing materials and medicaments during examination
- Monitor patient's vital during deep sedation surgery and also during recovery period post-surgery
- Exposes, develops, and mount full mouth X-rays
- Provides customer service support and patient care by escorting patients to and from treatment room and preparing them for surgery
- Records treatment information on the patient's chart, including treatment rendered, the amount of chair time, doctor time, and post-operatory notes
- Prepares all treatment room including, but not limited to set-up, decontamination, sterilization of all instruments, cleaning and restocking
- Educate patients on post-operative instructions for the most effective healing and great surgical result
